The information that follows should help answer some of the questions you may have about your diabetic foot sore and the medicine prescribed by your doctor. This brochure is educational and not intended to be medical advice. It does not take the place of talking to your doctor or healthcare provider about your treatment. By working together with your healthcare team, you can help ensure you are getting appropriate care.

Please also be sure to read the summary of Important Safety Information on pages 14-15 and the patient Medication Guide with the full Prescribing Information and Boxed Warning included in the pocket of this brochure. You should review the Medication Guide with your healthcare provider before you begin your treatment, at regular checkups, and each time you get a refill. There may be new information.

REGRANEX™ Gel has been granted the American Podiatric Medical Association Seal of Approval for products that promote good foot health.
Caring for your diabetic foot ulcer is a team effort and we are here to help. Use this brochure as a guide to caring for your diabetic foot or lower leg ulcer and finding help when you need it.

**What is a diabetic foot ulcer?**

More than 29 million Americans have been diagnosed with diabetes. The effects of diabetes can slow wound healing anywhere on the body. This can lead to a common type of sore called a diabetic foot ulcer, or DFU for short.

**Diabetes affects the feet mainly in 2 ways. It can cause:**

- Nerve damage
- Narrowing of the blood vessels

Because diabetes causes abnormal amounts of sugar in the blood, nerves in the body can be damaged. If this damage makes the nerves work poorly, this is known as “diabetic neuropathy.” A feeling of numbness and tingling in the foot may mean the nerves are damaged.

**Diabetic neuropathy mainly affects the nerves that supply sensation to the feet, which decreases the feeling of:**

- Pain
- Pressure
- Temperature

Because of this, a person with diabetes may not feel a small cut or a blister, shoes that are too tight, or bath water that is too hot.

Numbness in the feet may also change the normal balance of walking and standing. A person's poor balance while walking or standing may lead to fractures and flattened arches, which are often also painless due to the nerve damage. This can cause unusual pressure points, which may lead to blisters and poorly healing injuries.
Poor circulation

Diabetes can also affect the blood vessels of the feet, causing them to narrow. Narrow blood vessels carry less blood to the feet. A cold, blue, or pale foot may mean that the foot has very poor circulation. With less blood, the foot will not have enough oxygen and nutrients to heal and fight infections.

A wound or cut with poor blood supply may become infected or develop gangrene. Gangrene can be caused by infection or insufficient blood supply and could even require an amputation, the surgical removal of the infected part of the foot or leg.

When both the nerves and arteries are damaged, the patient with diabetes may not notice simple wounds, which can soon become serious infections that threaten the whole foot and even the leg. Early detection, care, and treatment can prevent amputation. Redness, swelling, and increased temperature in the foot are signs of infection.

You can’t always prevent a foot ulcer, but checking both feet daily can help. Look for sores, cuts, blisters, corns and redness.

How will my doctor treat my diabetic foot sore?

Your doctor will probably treat your sore, or DFU, using “good wound care,” which could include one or more of these methods:

- **Manage diabetes.** Managing your diabetes is the first line of defense when it comes to healing.

- **Debridement.** This is a process used by your doctor to remove dead or unhealthy tissue around the sore.

- **Infection/moisture control.** If your sore is infected, your doctor may prescribe antibiotics.

- **Off-loading.** Foot ulcers may be partly caused by too much pressure on one part of your foot. Off-loading means taking pressure off the sore by staying off your feet. Doctors sometimes suggest using crutches and/or special shoes or braces.

Sometimes, even when you and your doctor try these or other methods, some sores still won’t heal. That’s where a prescription medicine comes in.

Please turn the page for important information about a medicine that can be used to treat diabetic foot sores.

Call the hotline at 1-888-734-7263
When caring for your diabetic sore,

**Ask questions about REGRANEX® (becaplermin) Gel, 0.01%**

**What is REGRANEX?**

REGRANEX is a man-made protein medicine that is used with other ulcer care practices (such as good wound care) to treat diabetic sores (ulcers) of your legs or feet that are deeper than just your skin, in people who have good blood supply to the legs.

It is not known if REGRANEX is effective for the treatment of pressure ulcers or ulcers that are due to poor blood flow (circulation). It is not known if REGRANEX is safe and effective in children under 16 years of age.

**What is the most important information I should know about REGRANEX?**

- **People who use 3 or more tubes of REGRANEX may have an increased risk of death from cancer.**
  - You should talk with your healthcare provider about the possible benefits and risks to you if you use more than 3 tubes of REGRANEX.
  - If you already have cancer, you and your healthcare provider should carefully consider whether you will use REGRANEX.
  - If you decide to use REGRANEX, your healthcare provider will tell you how to use REGRANEX. See the section “How should I use REGRANEX?” on page 14.

**What medicines should I tell my healthcare provider about?**

Tell your healthcare provider about all medicines you are taking, including prescription and non-prescription medicines, vitamins, and herbal supplements. Especially tell your healthcare provider if you apply other medicines for diabetic ulcers of your legs or feet. Know the medicines you take. Keep a list of them to show your healthcare provider and pharmacist when you get a new medicine.

Please also be sure to read the summary of Important Safety Information on pages 14-15 and the patient Medication Guide with the full Prescribing Information and Boxed Warning included in the pocket of this brochure.
What should I tell my healthcare provider before using REGRANEX® Gel? Before you use REGRANEX tell your healthcare provider if you:

- have cancer
- have poor blood flow to your lower legs and feet
- have allergies to any of the ingredients in REGRANEX. See the end of this Medication Guide for a complete list of ingredients in REGRANEX
- have any other medical conditions
- are pregnant or plan to become pregnant. It is not known if REGRANEX will harm your unborn baby
- are breast-feeding or plan to breast-feed. It is not known if REGRANEX passes into your breast milk

Who should not use REGRANEX?

Do not use REGRANEX if you have a skin tumor at the area where you apply REGRANEX.

What are the possible side effects of REGRANEX?

REGRANEX may cause serious side effects.

- Common side effects of REGRANEX include:
  - Red skin rash
  - Burning at the application site

Tell your doctor if you have any side effect that bothers you or that does not go away. These are not all the possible side effects of REGRANEX Gel. For more information, ask your doctor or pharmacist. Call your doctor for medical advice about side effects. You may report side effects to FDA at 1-800-FDA-1088.

You may also report side effects to Smith & Nephew at 1-800-441-8227.
Prepare

- Wash hands and carefully measure the amount of REGRANEX Gel that your healthcare provider tells you to use and squeeze the amount of REGRANEX Gel needed on clean, firm, non-absorbable surface such as wax paper.
  - Your healthcare provider may change the amount needed as the sore heals and becomes smaller. Keep track on page 10.

Do not let the tip of the REGRANEX Gel tube touch the ulcer or any other surface.

Apply

Use application aid to spread REGRANEX Gel in a thin, even layer of approximately 1/16-inch thickness over the entire ulcer area, approximately the thickness of a penny.

Cover

- Cover area with saline-moistened gauze dressing.
- After approximately 12 hours, gently remove the dressing and rinse ulcer with saline or water to remove remaining REGRANEX Gel.
- Cover ulcer with new saline-moistened dressing (without REGRANEX Gel) for the remainder of the day.
Don’t forget to refrigerate REGRANEX° Gel.

Length of approximately 1g of REGRANEX Gel = 4 cm

Questions?

Visit the REGRANEX360° web site at www.REGRANEX360.com

Call the hotline at 1-888-REGRANEX (734-7263)

Monday through Friday, 8:30 am – 8:00 pm EST

Please also be sure to read the summary of Important Safety Information on pages 14-15 and the patient Medication Guide with the full Prescribing Information and Boxed Warning included in the pocket of this brochure.
Tips that may help you stick to your treatment plan

Ask for help.
Decide who is going to apply REGRANEX® Gel to your sore (you or a caregiver). Then, get everyone in your household on board with your treatment plan so they can remind you when it’s time to apply.

Set an alarm.
Your alarm clock can be a powerful reminder for when it’s time for dressing changes.

Make a note.
Write “REGRANEX Gel pm/am!” on a sticky note and attach it to your refrigerator.

Go high-tech.
Have a smart phone? Several reminder apps and text messaging services exist to help you avoid missed applications of your medication.

Use a calendar.
Keep track of your application schedule by marking the days you apply REGRANEX Gel on a calendar.

Call the hotline at 1-888-REGRANEX (734-7263)

Please also be sure to read the summary of Important Safety Information on pages 14-15 and the patient Medication Guide with the full Prescribing Information and Boxed Warning included in the pocket of this brochure.
When caring for your diabetic sore,

**Keep track when the amount of REGRANEX° Gel changes**

Your healthcare provider may change the amount of REGRANEX (becaplermin) Gel needed as the sore heals and becomes smaller. After each doctor’s visit, write down the date of the visit and the amount you are to apply each day until the next visit.

Checking your blood sugar? Go ahead and check your feet at the same time!

Call the hotline at 1-888-REGRANEX (734-7263)
When caring for your diabetic sore, 

Know the facts about 
REGRANEX° (becaplermin) Gel, 0.01%

How should I use REGRANEX?

• Use REGRANEX together with good ulcer care, as prescribed by your healthcare provider. This includes following your healthcare provider’s instructions about not putting weight on the affected leg and foot (non-weight-bearing).

• Use REGRANEX exactly as your healthcare provider tells you to use it.

• REGRANEX is for use on diabetic sores only. Do not use REGRANEX in your mouth, eyes, or vagina.

• REGRANEX comes as a gel. Your healthcare provider should tell you how often to use REGRANEX and how much REGRANEX to use.

• Your healthcare provider should check the size of your ulcer every 1 to 2 weeks.

• Your healthcare provider may change the amount of REGRANEX to be applied to your ulcer as the size of your ulcer changes. So, the amount of REGRANEX to be squeezed from the tube may change as the size of your ulcer changes.

• Close your REGRANEX tube tightly after each use.

• Put the REGRANEX tube back in the refrigerator after each use.

• Use a cotton swab, tongue depressor, or other application aid when you apply your REGRANEX. Do not let the tip of your REGRANEX tube touch the ulcer or any other surface.

• Apply REGRANEX one time each day.

Call the hotline at 1-888-REGRANEX (734-7263)

Please also be sure to read the summary of Important Safety Information on pages 14-15 and the patient Medication Guide with the full Prescribing Information and Boxed Warning included in the pocket of this brochure.
How should I store REGRANEX® Gel?

• Store REGRANEX in the refrigerator at 36°F to 46°F (2°C to 8°C).
• Do not freeze REGRANEX.
• Do not use REGRANEX after the expiration date on the bottom (sealed end) of the tube.
• When your REGRANEX is out of date or no longer needed for your treatment, please dispose of properly. To find proper disposal guidelines, please visit the FDA website.

Keep REGRANEX and all medicines out of the reach of children.

General information about REGRANEX.

Medicines are sometimes prescribed for purposes other than those listed in a Medication Guide. Do not use REGRANEX for a condition for which it was not prescribed. Do not give REGRANEX to other people, even if they have the same symptoms that you have. It may harm them.

This Medication Guide summarizes the most important information about REGRANEX. If you would like more information about REGRANEX, talk to your healthcare provider. You can ask your healthcare provider or pharmacist for information about REGRANEX that is written for healthcare professionals.

What are the ingredients in REGRANEX?

Active ingredient: becaplermin

Inactive ingredients: carboxymethylcellulose sodium, glacial acetic acid, l-lysine hydrochloride, m-cresol, methylparaben, propylparaben, sodium acetate trihydrate, sodium chloride, and water for injection.
When caring for your diabetic sore,

Get support every step of the way

What is REGRANEX360°?

REGRANEX360 is a comprehensive program designed to support you while using REGRANEX° (becaplermin) Gel, 0.01%. We simplify the prior authorization process and offer one-on-one live support throughout your course of therapy.

How it works

• Your doctor initiates the process by contacting us; a representative will call you to finalize the process

REGRANEX360 takes care of the rest

Expect a call from REGRANEX360°

A representative from REGRANEX360 will call you to discuss insurance verification and answer any questions you may have.

• REGRANEX Gel is covered under many prescription drug plans (including most Medicare Part D plans and many state Medicaid plans)

• Your insurance company may need a prior authorization before it will cover the cost of a prescription for REGRANEX Gel

Please also be sure to read the summary of Important Safety Information on pages 14-15 and the patient Medication Guide with the full Prescribing Information and Boxed Warning included in the pocket of this brochure.
What you get

- Verification of patient benefit plan
- Coordination of prior authorization submissions and appeals
- Coverage investigation and facilitation of co-pay assistance if eligible
- Follow-up with the patient around delivery, application, and compliance with REGRANEX\textsuperscript{\textregistered} Gel instructions
- Assistance from a patient care coordinator about getting access to and using the product
- Information about whether home delivery is available and how to arrange it

How to contact

Visit the REGRANEX360° web site at www.REGRANEX360.com

Call the hotline at 1-888-REGRANEX (734-7263)

Monday through Friday, 8:30 am – 8:00 pm EST
When caring for your diabetic sore,

**Review important safety information**

People who use 3 or more tubes of REGRANEX® Gel may have an increased risk of death from cancer.

- You should talk with your healthcare provider about the possible benefits and risks to you if you use more than 3 tubes of REGRANEX Gel.

- If you already have cancer, you and your healthcare provider should carefully consider whether you will use REGRANEX Gel.

- REGRANEX (becaplermin) Gel is a man-made protein medicine that is used with other ulcer care practices (such as good wound care) to treat diabetic sores (ulcers) of your legs or feet that are deeper than just your skin, in people who have good blood supply to the legs.

- It is not known if REGRANEX Gel is effective for the treatment of pressure ulcers or ulcers that are due to poor blood flow (circulation).

- It is not known if REGRANEX Gel is safe and effective in children under 16 years of age.

**Do not use REGRANEX Gel if you have a skin tumor at the area where you apply the product.**

**Before you use REGRANEX Gel, tell your healthcare provider if you:**

- Have cancer.

- Have poor blood flow to your legs and feet.

- Have allergies to any of the ingredients in REGRANEX Gel. See the Medication Guide for a complete list of ingredients.

- Have any other medical conditions.

- Are pregnant or plan to become pregnant. It is not known if REGRANEX Gel will harm your unborn baby.

- Are breast feeding or plan to breast feed. It is not known if REGRANEX Gel passes into your breast milk.

- Take any medicines (including prescription and non-prescription medicines, vitamins, and herbal supplements). Especially tell your healthcare provider if you apply other medicines to diabetic ulcers of your legs or feet.
If you decide to use REGRANEX® Gel, use the product exactly as your healthcare provider tells you to use it. This includes following your healthcare provider’s instructions about not putting weight on the affected leg and foot (non–weight bearing).

- REGRANEX Gel is for use on diabetic sores only. Do not use REGRANEX Gel in your mouth, eyes, or vagina.

- See the Medication Guide for more information.

**INDICATIONS AND USAGE**

REGRANEX Gel contains becaplermin, a human platelet-derived growth factor that is indicated for the treatment of lower extremity diabetic neurogenic ulcers that extend into the subcutaneous tissue (Stage I or II, IAET staging classification) or ischemic diabetic ulcers. REGRANEX Gel should be used with caution in patients with known malignancy. (1.2)

**ADVERSE REACTIONS**

Erythematous rashes occurred in 2% of patients treated with REGRANEX Gel (6.1).

**WARNINGS AND PRECAUTIONS**

- **Cancer and Cancer Mortality**
  - Known neoplasm(s) at the site(s) of application (4).
  - Malignancies distant from the site of application have been reported in patients receiving REGRANEX Gel. (5.1)
  - The effects of REGRANEX Gel on exposed joints, tendons, ligaments, and bone have not been established in humans. (1.2)
  - REGRANEX Gel is a non-sterile, low bioburden preserved product. Therefore, it should not be used in wounds that close by primary intention. (5.1)

**DOSE AND ADMINISTRATION**

For topical use: not for oral, intranasal or intramuscular use. (2)

To calculate the length of REGRANEX Gel to apply to treat the ulcer, the greatest length of the ulcer by the greatest width of the ulcer in either inches or centimeters. (2)

- **Restricted Drug**
  - REGRANEX Gel is a restricted drug (B) and should be dispensed with appropriate prescription quantity codes.
MEDICATION GUIDE

REGRANEX® (RE-GRAN-IX) (becaplermin) Gel

Read this Medication Guide before you start using REGRANEX and each time you get a refill. This may be new information. This information does not take the place of talking to your healthcare provider about your medical condition or your treatment.

What is the most important information I should know about REGRANEX?

People who use 3 or more tubes of REGRANEX may have an increased risk of death from cancer.

You should talk with your healthcare provider about the possible benefits and risks to you if you use more than 3 tubes of REGRANEX.

If you already have cancer, you and your healthcare provider should carefully consider whether you will use REGRANEX.

If you decide to use REGRANEX, your healthcare provider will tell you how to use REGRANEX. See the section “How should I use REGRANEX?” below.

What is REGRANEX?

REGRANEX is a man-made protein medicine that is used with other ulcer care practices (such as good wound care) to treat diabetic sores (ulcers) of your legs or feet that are deeper than just your skin, in people who have good blood supply to the legs.

It is not known if REGRANEX is effective for the treatment of pressure ulcers or ulcers that are due to poor blood flow (circulation).

It is not known if REGRANEX is safe and effective in children under 16 years of age.

Who should not use REGRANEX?

Do not use REGRANEX if you have a skin tumor at the ulcer site you are applying REGRANEX to.

What should I tell my healthcare provider before using REGRANEX?

- have cancer
- have poor flow to your lower legs and feet
- have allergies to any of the ingredients in REGRANEX. See the end of this Medication Guide for a complete list of ingredients in REGRANEX.
- have any other medical conditions
- are pregnant or plan to become pregnant. It is not known if REGRANEX will harm your unborn baby.
- are breastfeeding or plan to breast-feed. It is not known if REGRANEX passes into your breast milk.

Tell your healthcare provider about all the medicines you use including prescription and non-prescription medicines, vitamins, and herbal supplements. Especially tell your healthcare provider if you apply other medicines to diabetic ulcers of your legs or feet. Know the medicines you take. Keep a list of them to show your healthcare provider and pharmacist when you get a new medicine.

How should I use REGRANEX?

Use REGRANEX together with good ulcer care, as prescribed by your healthcare provider. This includes following your healthcare provider’s instructions about not putting weight on the affected leg and foot (non-weight-bearing).

Use REGRANEX exactly as your healthcare provider tells you to use it.

REGRANEX is for use on skin ulcers only. Do not use REGRANEX in your eyes, ears, or vagina.

REGRANEX comes as a gel. Your healthcare provider should tell you how often to use REGRANEX and how much REGRANEX to use.

Your healthcare provider may change the amount of REGRANEX to be applied to your ulcer as the size of your ulcer changes. So, the amount of REGRANEX to use may change as your ulcer changes.

Put the REGRANEX tube back in the refrigerator after the expiration date on the bottom, capped end of the tube.

Before you use REGRANEX tell your healthcare provider if you:

- use REGRANEX together with good ulcer care, as prescribed by your healthcare provider. This includes following your healthcare provider’s instructions about not putting weight on the affected leg and foot (non-weight-bearing).

- use REGRANEX exactly as your healthcare provider tells you to use it.

- REGRANEX is for use on skin ulcers only. Do not use REGRANEX in your eyes, ears, or vagina.

- REGRANEX comes as a gel. Your healthcare provider should tell you how often to use REGRANEX and how much REGRANEX to use.

- Your healthcare provider may change the amount of REGRANEX to be applied to your ulcer as the size of your ulcer changes. So, the amount of REGRANEX to use may change as your ulcer changes.

- Put the REGRANEX tube back in the refrigerator after each use.

- Use a cotton swab, tongue depressor, or similar application aid to spread the REGRANEX gel in a thin layer over the surface of the ulcer on your foot or leg.

- Cover the area with a saline-moistened gauze dressing.

- After about 12 hours, gently rinse the ulcer with saline or water to remove the rest of the REGRANEX. Cover the ulcer with a new saline-moistened gauze dressing. Do not apply any more REGRANEX.

What are the possible side effects of REGRANEX?

REGRANEX may cause serious side effects.

See the section, “What is the most important information I should know about REGRANEX?”

Common side effects of REGRANEX include:

- red skin rash
- burning at the application site

Tell your doctor if you have any side effect that bothers you or that does not go away.

These are not all the possible side effects of REGRANEX gel. For more information, ask your doctor or pharmacist.

Call your doctor for medical advice about side effects. You may report side effects to FDA at 1-800-FDA-1088. You may also report side effects to Smith & Nephew, Inc. at 1-800-441-8227.

How should I store REGRANEX?

- Store REGRANEX in the refrigerator at 36°F to 46°F (2°C to 8°C).
- Do not freeze REGRANEX.
- Do not use REGRANEX after the expiration date on the bottom (sealed end) of the tube.
- Throw away your REGRANEX that is out of date or no longer needed for your treatment.

Keep REGRANEX and all medicines out of the reach of children.

General information about REGRANEX

Medicines are sometimes prescribed for purposes other than those listed in a Medication Guide. Do not use REGRANEX for a condition for which it was not prescribed. Do not give REGRANEX to other people, even if they have the same symptoms that you have. It may harm other people.

This Medication Guide summarizes the most important information about REGRANEX. If you would like more information about REGRANEX, talk to your healthcare provider. You can ask your healthcare provider or pharmacist for information about REGRANEX that is written for healthcare professionals.

The ingredients are in REGRANEX:

Active ingredients: becaplermin
Inactive ingredients: carboxymethylcellulose sodium, glacial acetic acid, 1-lysine hydrochloride, m-cresol, methylparaben, propylparaben, sodium acetate trihydrate, sodium chloride, and water for injection.
